Full Time Inhouse Designer - Frontend Developer

2009 - Present

PD Bishop Design + VPH (freelance)
Self Employed Web Design Business

Points of Interest

My passion for web design and the online world, drives my aspiration to create increasingly beautiful, functional and accessible websites.

4+ years experience as a professional web designer + frontend developer.

I have a proven track record working on a variety of websites from globally recognised brands to small local businesses in Australia, US and UK.

During my time at VPH London, I worked with high end clients like Bacardi Global, Canadian Club and Berghaus. At times it was a fast paced environment and required me to adhere to deadlines.

Ability to work with other designers, project managers and developers seamlessly. Team work is an intrinsic part of my character both in and outside the office, as I've played high level representative basketball for the past 7 years.

Able to work directly with clients, and discuss ideas to get a clear understanding of their requirements and work together to generate ideas & solve problems.

My experience working as an employee of a web agency and as independent freelancer has allowed me to develop my skills & knowledge in multiple stages of the design and development process.

For a majority of my experience I've worked under the direction of a senior designer & developer, Pete Bishop. Who has mentored me to hone my expertise and always be committed to understanding new technologies and upgrading my skill set.

Regularly attend webinars on social networking, blog and inbound marketing techniques + continue to advance my skills in HTML 5 + CSS 3 + PHP + JQUERY.
